EDUCATION

2022 - 2024
MANIPAL INSTITUTE OF TECHNOLOGY

- Master of Computer Applications

2019 - 2022
JSS SHRI MANJUNATHESWARA INSTITUTE OF UG & PG STUDIES

- Bachelor of Computer Applications

SKILLS

- Programming Languages: C#, SQL
- Frameworks: ASP.NET Core, MVC, Entity Framework
- Web Services: RESTful APIs
- Database Management: SQL Server, PostgreSQL
- Tools: Visual Studio
- Development Practices: Dependency Injection, Unit Testing
- Frontend Technologies: HTML, CSS, JavaScript, AJAX
- Soft Skills: Strong problem-solving, communication, and teamwork skills

PROFILE SUMMARY

Detail-oriented and motivated DotNet Developer with hands-on experience in designing, developing, and maintaining web applications using C# and ASP.NET Core. Proficient in building scalable APIs and implementing robust security features. Passionate about continuous improvement and delivering high-quality solutions.

WORK EXPERIENCE

SECON | Bangalore MARCH 2024 - APRIL 2025
.NET Full Stack Developer

- Developed and maintained scalable web applications using Visual Studio IDE in a 3-tier architecture encompassing Business Logic Layer (BLL), Data Access Layer (DAL), Data Object Layer (DOL).
- Designed and implemented secure Web APIs for seamless communication between client and server, incorporating JWT authentication and authorization.
- Utilized Entity Framework (EF) as an Object-Relational Mapper (O/RM) for efficient database interactions and management of SQL Server databases.
- Integrated ASP.NET Identity Framework for role-based authentication and authorization to enhance application security.

PROJECTS

Hindustan Petroleum Private Limited (HPPL) & Gujarat Irrigation Master Plan (GIMP)

- Enhance existing features and build new functionalities within the 3-tier MVC architecture.
- Develop and optimize Web APIs using JWT for secure client-server communication, ensuring data confidentiality and integrity across multiple endpoints.
- Utilize Entity Framework for database migrations, schema updates, and query optimization to maintain data consistency. Perform regular performance tuning to improve query execution times and database efficiency.
- Implement role-based authentication and authorization using ASP.NET Identity Framework, ensuring secure access control.
- Provided ongoing maintenance and support, including updates and feature enhancements, to meet evolving business needs.
